ABOUT ME

When I was very young, I interacted with computers and machinery a lot, growing up the interest in cars, machines and technology grew on me, enough, that I decided to work with cars and computers instead of being a Lawyer!

WORK EXPERIENCE

Karrotz Inc. (Toronto, Ontario)

2022 - 2023

Product & Project Manager

- Created and designed marketing campaigns (social media) which resulted in 22% growth within the first month
- Built and deployed websites using MERN, MVC, API's, OOP and Figma
- Lead both backend and front end, as well as tested, iterated, and debugged software
- Designed applications for business work flow and customer facing access, using Node.JS, React, MongoDB and CSS

Self-employed (Canada / USA)

2005 - 2023

Product Manager

- Created and designed websites using HTML, CSS, JavaScript, Node.js, MERN, MVC, OOP, NoSQL, MySQL, etc.
- Prototype and developed electronic hardware using microcontrollers, sensors, and actuators with programming languages like Arduino IDE, Python, C++, etc. instrumentation, locks, doors, etc.
- Managed restoration projects, automotive products, instruments, marketing projects for small business, websites, and digital ads.

SCCC Inc. (San Mateo, California)

2015 - 2022

Manager and Partner

- Managed classic car restoration projects for customers and managed own products, as classic cars that we acquired, restored, and sold.
- Multiple duties included: managing employees, outsource services, ordering parts and supplies, deal with customers and 3rd party's payees.
- Setup and deployed marketing and business strategies, building websites and ads, finding market desires and needs, for products and services that we provided, delivered great products, up to the highest level, example delivering and selling our own classic car at the famous Pebble Beach Mecum Auction in Monterrey, California.

ENVIROCAR and DACCI (Toronto, Ontario)

2011 - 2015

Project Manager

- Managed employees, suppliers. Dealt with customers and insurance companies, providing best service and products on time and within the price range set by insurance companies.
- Organized purchase of parts and outsource services with costs and delivery time in mind.

ONTARIO CHRYSLER (Mississauga, Ontario)

2009 - 2011

Project Manager and Estimator

- Experienced full on customer service, employee's supervision, suppliers' setup and handling, 3rd party's payees (Insurance), setup and deployment of marketing campaigns, managed work process and deliveries great way to learn in a whole how a business works and profits.

DFC (Toronto, Ontario)

2003 - 2009

Car washer to Shop Foreman

- Started washing cars and few months later promoted to parts representative, service consultant, shop foreman and manager assistant within the company. Promoted for good customer service, commitment, and work orders management.

EDUCATION

- Full Stack Web Development bootcamp at University of Toronto. Software development, Robotics and Electronics at Techshop in San Francisco, California.
- Several product management courses from companies like: Porsche, Nissan, Subaru, and Chrysler. Multiple customer service, marketing, computer science short courses from Stanford, Harvard, College of San Mateo California.
- Law School at University Pontifical Catholic of Campinas in Brazil.
- Computer science and I.T. self-thought training at own family software company from the 90's (Visual Basic).
